BACKGROUND:

Traffic Engineering has completed a speed study on Ronald Reagan Boulevard (CR-427) between Church Avenue and US 17-92. The existing speed limit in this 3.7 mile section varies from 40 to 45 mph. The purpose of the study was to determine the feasibility of creating a consistent speed limit throughout the corridor. Speed studies completed along the 40 mph sections indicate 85th percentile speed of 51 mph with 15% of the daily volume in excess of 51 mph. In accordance with Florida Statutes, Chapter 316, current conditions support an increase to 45 mph which would provide a consistent posting of 45 mph from Church Avenue to US 17-92 (3.7 miles).

STAFF RECOMMENDATION:

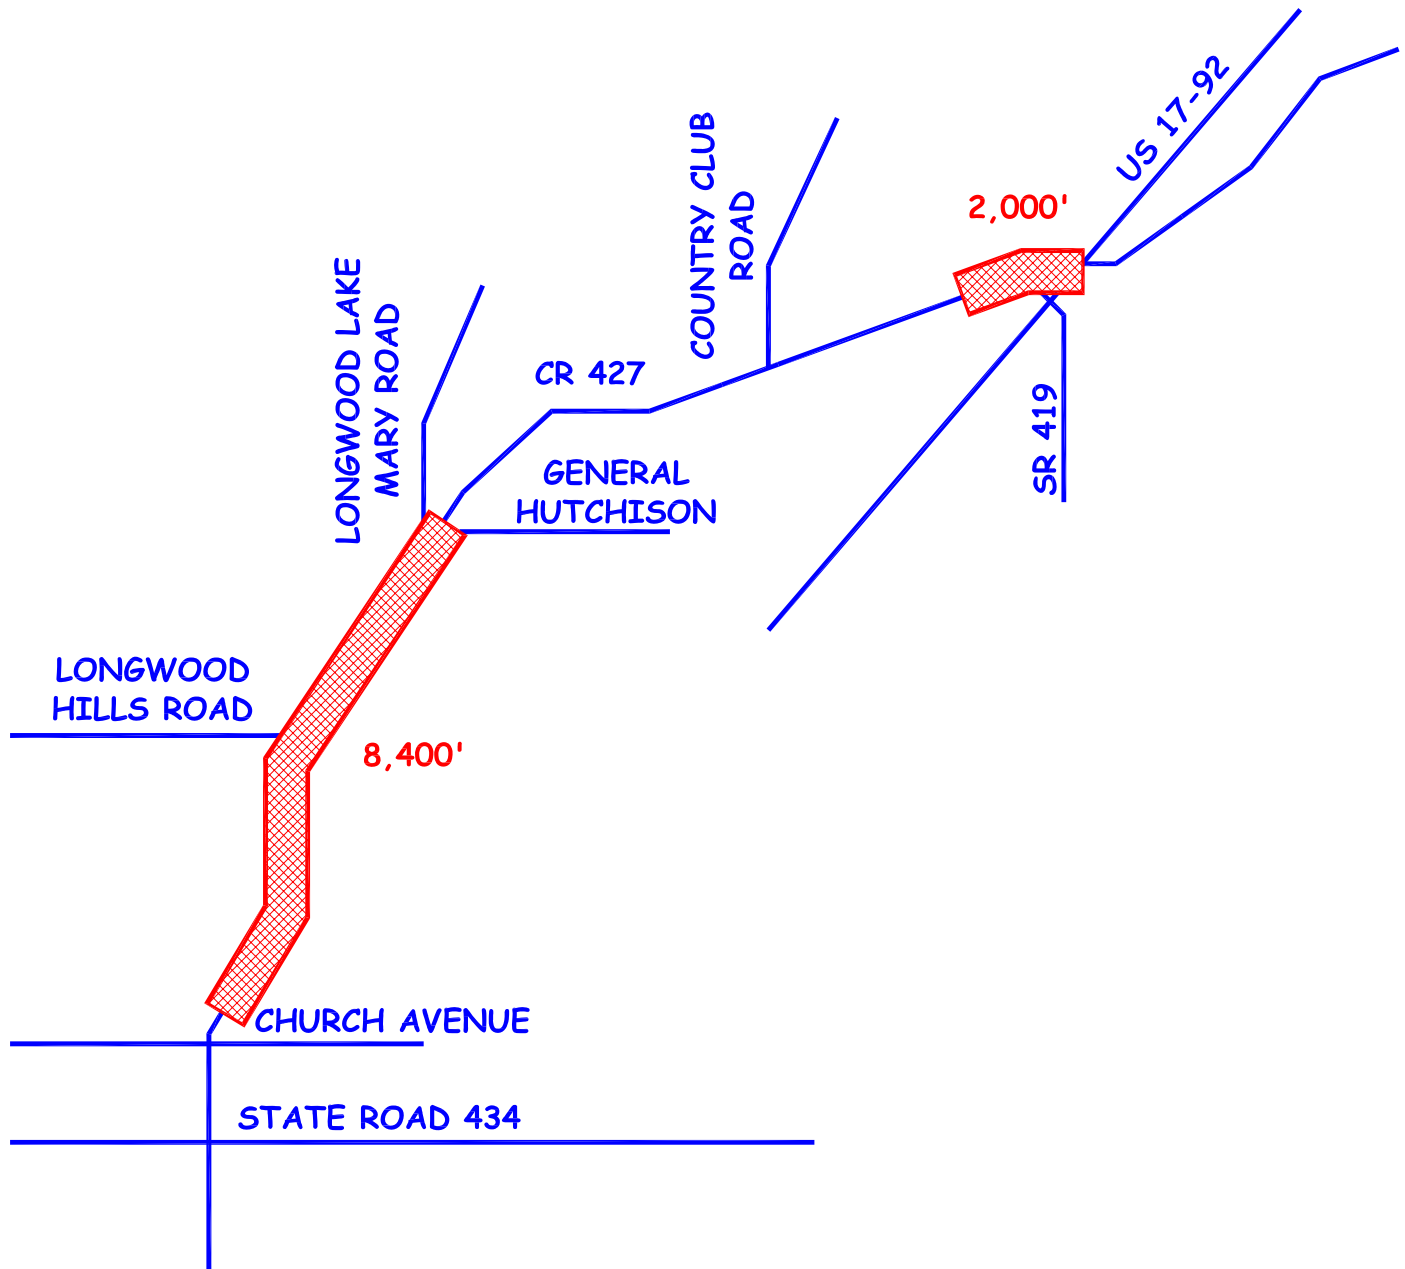

Traffic Engineering recommends approval of this Resolution to increase the speed limit on Ronald Reagan Boulevard (CR-427) from US 17-92 to north of Church Avenue from 40 mph to 45 mph.
